About Seminar :

This seminar entitled on "Contemporary Advancements and Innovations in Chromatography and Analytical Techniques: IPR perspectives" focuses on importance of IPR in Pharmacy. The largest supplier of generic drugs worldwide is India. More than half of the world's demand for vaccines, 40% of generic medications in the US, and 25% of all pharmaceuticals in the UK are supplied by the Indian pharmaceutical industry. India is the third-largest pharmaceutical producer in the world by volume and the 14th-largest by value. 10,500 production units and 3,000 pharmaceutical companies operate in the domestic market. India plays a significant role in the global pharmaceutical industry. The nation also has a sizable pool of scientists and engineers who can advance the industry.

Topics to be covered:

- # Intellectual Property Rights
- # What role do Intellectual Property Rights (IPR) play in protecting the pharmaceutical industry?
- # Patent Protection of Drugs
- # Progressive Economic Growth
- # Consumer Protection
- # Safeguard against potential infringement
- # The Indian Pharmaceutical Industry's Future

Intellectual Property Rights
& Pharmaceuticals

About the College

V. V. Institute of Pharmaceutical Sciences was established in the year 2010 as esteemed promotions of A.A.N.M. & V.V.R.S.R. Educational Society.

The College aims to provide Quality Education, Training and Research facilities of high standard in Pharmaceutical Sciences and strives hard to achieve its objectives through sincere, dedicated efforts, discipline and hard work. The college is equipped with sophisticated equipment's in well-established laboratories and the state of the art library with 1646 Titles and 6112 Volumes, subscription of 200 E-journals, 1620 E-Books, DELNET Networking and Magazines to meet the needs of the students. Our college research publications include more than 300 articles in reputed journals.

Courses Offered:

B. Pharmacy : 100 Seats

M. Pharmacy:

Pharmaceutics: 15 Seats

Pharm. Analysis: 15 Seats

Outcomes of the Programme:

The students & faculty have gained knowledge on Contemporary Advancements and Innovations in Chromatography and Analytical Techniques along with IPR.

They gain the knowledge on:

- Research is an ongoing and iterative endeavor aimed at discerning the underlying issue at hand and subsequently devising a viable resolution.
- The primary objective of this study is to concentrate on the advancement of analytical methodologies by employing novel combinations of well-established instruments and approaches.
- The research conducted encompasses fundamental investigations into the characteristics of identity, purity, content, and stability of starting materials, excipients, and active pharmaceutical ingredients.
- The department is engaged in the education and training of postgraduate students in the field of analytical sciences, specifically focusing on the qualitative determination of natural and synthetic compounds in diverse matrices.
- This is achieved through the application of spectroscopy, chromatography, and other analytical methodologies.
- This instructional module aims to facilitate students' comprehension of diverse principles, methodologies, and instruments employed in the realm of scientific research.

PROGRAMME REPORT

Programme Name	A one-day seminar on “ Contemporary Advancements and Innovations in Chromatography and Analytical Techniques: IPR Prospectives ”
Resource Person	Mrs. D. Vasavi Devi, Associate Professor, Associate Professor, P. Ramireddy Memorial College of Pharmacy, Kadapa, AP.
Date of Activity	28-06-2018
Organized By	V. V. Institute of Pharmaceutical Sciences
Venue	Room No: 109, V. V. Institute of Pharmaceutical Sciences

The objective of the Programme:

To answer the question of how Intellectual Property Rights (IPR) affect chromatography and analytical procedures, one must grasp IP's fundamental concepts and how they apply to scientific innovation. Intellectual property (IP) encompasses innovations, literary and artistic works, designs, symbols, names, and commercial images. Common forms of IP include patents, copyrights, trademarks, and trade secrets.

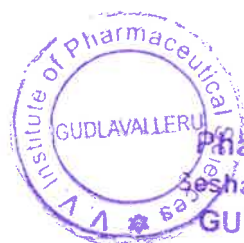

Topic Covered:

IPR can benefit chromatography and analysis in many ways:

- Patents: The patent holder has exclusive rights to use and market inventions for a specified time. New chromatographic methods, apparatus, and compositions can be patented if they are unique, non-obvious, and industrially applicable.
- Trademarks protect trademark names, emblems, and logos. In chromatography, this can involve instrument or reagent branding.
- Trade secrets preserve proprietary knowledge that offers a corporation an edge. Unknown chromatographic techniques or formulations may be included.

According to these ideas, IPR in chromatography and analytical procedures promotes innovation, protects creators' economic interests, and advances science and technology.

Pharmaceutical Sciences
Seshadri Rao Knowledge Village
GUDLAVALLERU - 521 356

About Seminar :

This Seminar entitled on "Current Research on Pharmaceutical Formulations and Active Pharmaceutical Ingredient" focuses on innovative development strategies in Pharmacy. Researchers were exploring various drug delivery technologies, such as nano particles, liposomes. The innovative strategies are required in Pharmacy hence this conference builds an informative session on research activities such as 3D Printing of pharmaceuticals and API synthesis and development. inculcates younger minds to think innovatively and their involvement in research in order to meet regulatory standards and safe for human use.

Topics to be covered:

- #Novel Drug Delivery System.
- #Nano Technology in Drug Delivery.
- #Combination Drug Product.
- #Peptide And Protein Formulation.
- #Co-crystals And Solid-State Chemistry.
- #Quality By Design and Process Analytical Technology.
- #Biopharmaceutical And Biosimilars.

E-mail : venkatadripharmacy@gmail.com, Website : www.vvipsgudlavalleru.ac.in

Outcomes of Programme:

The students & faculty learned “**Current Research on Pharmaceutical Formulations and Active Pharmaceutical Ingredients**” programme.

They gain the knowledge on:

- Research in this area often leads to the development of more effective and efficient drug delivery methods.
- Studies on formulation may result in improvements in the bioavailability of drugs, ensuring that a larger proportion of the administered dose reaches the large site in the body.
- Optimization of formulation can help in minimizing unwanted side effects associated with certain drugs, making them safer for patients.
- Research outcomes may contribute to the development of formulation that meet regulatory requirements and quality standards. Involve in understanding the behaviour of active pharmaceutical ingredients within formulations in drug design and synthesis.

Handwritten signature in green ink.

PROGRAMME REPORT

Programme Name	A one-day seminar on " Current Research on Formulation and Active Pharmaceutical Ingredients ".
Resource Person	Mr. K.S. Sumanth , Assistant Professor, Sri Vasavi Institute of Pharmaceutical Sciences, Pedatadepalli, Tadepalligudem.
Date of Activity	23-08-2019
Organized By	V. V. Institute of Pharmaceutical Sciences
Venue	Seminar Hall, V. V. Institute of Pharmaceutical Sciences

Objective of the Programme:

Develop novel drug delivery systems (such as nanoparticles, liposomes, micelles) to improve drug solubility, stability, and targeted delivery. Enhance the bioavailability of poorly soluble drugs through techniques like solid dispersion, cyclodextrin complexation, and lipid-based formulations. Investigate approaches to tailor drug formulations to individual patient characteristics (e.g., genetics, metabolism) for optimized therapeutic outcomes. Study techniques to improve the stability and shelf-life of pharmaceutical formulations, especially for biologics and sensitive molecules. Explore ways to formulate and deliver combination therapies (multiple drugs or drug-device combinations) for synergistic effects or to address complex diseases.

Topic Covered:

- Nanotechnology and nanoparticles.
- Biopharmaceuticals and biosimilars.
- Personalized Medicine.
- Drug-Drug interactions and compatibility.
- Controlled release and sustained release formulations.
- Solubility enhancement techniques.
- Drug delivery systems
- Regulatory compliance and safety.

Topics to be covered:

- #Recent advancements in Analytical chemistry
- #Employment opportunities
- # Economic growth
- # Establishing New Industries
- # Skills required for the personal setup.

About Seminar :

This Seminar entitled on “Exploration Entrepreneurship potentials in Analytical Chemistry” focuses on creating employment opportunities to students. It can help to turn scientific discoveries into practical solutions, create new jobs and industries, and economic growth, and promote sustainability. Chemists should be self-confident in thinking about entrepreneurship because they have the knowledge, problem-solving skills, adaptability, entrepreneurial mindset, and expertise that are necessary for starting a successful business.

PROGRAMME REPORT

Programme Name	A one-day seminar on “ Exploration of Entrepreneurship potentials in Analytical Chemistry ”.
Resource Person	Dr. V. Bhaskara Raju , Associate Professor, Sri Vasavi Institute of Pharmaceutical Sciences, West Godavari Dist., Tadepalligudem, AP.
Date of Activity	20-09-2019
Organized By	V. V. Institute of Pharmaceutical Sciences
Venue	Seminar Hall, V. V. Institute of Pharmaceutical Sciences

The objective of the Programme:

With the ever-increasing pace of change in the Chemical and Pharmaceutical Industry, universities need to be more aware of the skill set that employers are seeking in graduates. These skills often include risk-taking, creative thinking, and entrepreneurship, skills that are not naturally associated with chemistry-related curriculums. The Chemical and Pharmaceutical industry is rapidly changing, and literature has reported that employers within these industries look for graduates who are not only technically competent but also know how for-profit organizations function. Interestingly, although 50% of students felt that creative thinking was a skill that describes entrepreneurship, only 25% of students thought that it was necessary in the chemical and pharmaceutical industries, and an alarming 77% of students thought their degree had not helped them increase their creative thinking ability. One of the critical attributes of an entrepreneur is idea generation and creation. Therefore, students must be provided with this opportunity within their degrees.

Topic Covered:

- ✓ Employment Opportunities
- ✓ Knowledge of Research methods.
- ✓ Merits & De-merits
- ✓ Recent Advancements in Analytical Chemistry
- ✓ Skills required for the person

About Seminar :

This Seminar entitled on "Integration of Herbal Medicines & Nutraceuticals with Modern Medicine to Master Entrepreneurship" focuses on innovative development strategies in Pharmacy. The integration of Herbal Medicines into Modern-medical, medical practices including cancer treatments must be taken into account the inter-related issues of quality, safety, efficacy. Quality is the paramount issue because it can affect the safety or efficacy of herbal product being used. Herbal Medicine quality can also be attributed to regulatory practices.

Topics to be covered:

- # Research & Development in Herbal Medicines
- # Advancements in nutraceuticals
- # Cancer treatments by herbals
- # Regulatory practices
- # Nanoparticles in Analysis.
- # Safety & Efficacy parameters involved in herbal medicines.

Outcomes of Programme:

The students & faculty learned new Integration of Herbal Medicines & Nutraceuticals with Modern Medicine.

They gain the knowledge on:

- Research is the continuous process to identify the problem and find its solution.
- It is to focus on the development of Herbal Medicines using new approaches.
- It involves basic research in identity, purity, content, stability of Herbal materials.
- Herbal medicine quality and standardization by Quality assurance and quality control

PROGRAMME REPORT

Programme Name	A one-day seminar on “Integration of Herbal Medicines & Nutraceuticals with Modern Medicine to Master Entrepreneurship.”
Resource Person	Ms. K. Nirmala, Associate Professor, K.G.R.L. College of Pharmacy, Bhimavaram, West Godavari Dist., A.P.
Date of Activity	11-10-2019
Organized By	V. V. Institute of Pharmaceutical Sciences
Venue	Seminar Hall, V. V. Institute of Pharmaceutical Sciences

The objective of the Programme:

In spite of the number of hurdles, the traditional medicine of India is acknowledged widely around the world, and the demand is increasing continuously. The combined effort of the public and government sectors is essential for the promotion of herbal medicine. In a number of countries, herbal medicines are unregulated, which has led to product quality differences. Product quality improvement may be achieved by implementing control measures from the point of medicinal plant procurement under good agricultural practices (GAPs) and the manufacture of the finished botanical products under good manufacturing practices (GMPs), plus post-marketing quality assurance surveillance. For valid integration, pharmacological and, especially, clinical studies must be conducted on those plants lacking such data. Adverse events, including drug-herb interaction, must also be monitored to promote a safe integration of efficacious herbal medicine into conventional medical practices.

Topic Covered:

- ✓ Recent Developments in herbal medicines
- ✓ Major issues of integration of herbal medicines
- ✓ Herbal Quality issues
- ✓ Quality Assurance/ Quality control involved in processing and manufacturing of herbal medicines
- ✓ Herbal Mechanism of Action & Bioavailability
- ✓ Herb-drug interactions
- ✓ Safety and efficacy Measurements.

06th November 2019.

CIRCULAR

This is to inform you that a one-day seminar on “**Emerging trends and updates in biomedical and clinical research**” by **Mr. Vaddadi Abhishek, Junior Chemist, Celebrity Laboratories, Kondapalli** being organized by V. V. Institute of Pharmaceutical Sciences on **12th Nov 2019**. I request you all to register immediately and to attend the program.

Venue: VVIPS Seminar Hall

Timings: 10:00 AM

PRINCIPAL
V. V. Institute of

Pharmaceutical Sciences
Seshadri Rao Knowledge Village
GUDLAVALLERU - 521 356

About Seminar :

This Seminar entitled on "Emerging Trends and Updates in Bio-Medical and Clinical Research" focuses on innovative development strategies in Pharmacy. Bio-Medical research by integrating massive amounts of data from laboratory experiments, clinical investigations and health care records. Especially the rate at which information is obtained from omics technologies. Providing an opportunity for future advances in way to improved patient care. The innovative strategies are required in Pharmacy hence this conference builds an informative sessions on research activities which inculcates younger minds to think innovatively and their involvement in research in order to meet social needs so that they reach the level of greatness as they deserves it.

Topics to be covered:

- # Analytical Research & Development.
- # Data Analytics in Bio-Medical Research.
- # Multiomics Bigdata.
- # Bio-Medical Data Management.

About the College

V. V. Institute of Pharmaceutical Sciences was established in the year 2010 as esteemed promotions of A.A.N.M. & V.V.R.S.R. Educational Society.

The College aims to provide Quality Education, Training and Research facilities of high standard in Pharmaceutical Sciences and strives hard to achieve its objectives through sincere, dedicated efforts, discipline and hard work. The college is equipped with sophisticated equipment's in well-established laboratories and the state of the art library with 1646 Titles and 6112 Volumes, subscription of 200 E-journals, 1620 E-Books, DELNET Networking and Magazines to meet the needs of the students. Our college research publications include more than 300 articles in reputed journals.

Courses Offered:

B. Pharmacy : 100 Seats

M. Pharmacy:

Pharmaceutics: 15 Seats

Pharm. Analysis: 15 Seats

Outcomes of the Programme:

The participants have learned about the Emerging Trends and Updates in the field of Biomedical and Clinical Research.

They gain the knowledge on:

- Research is the continuous process to identify the problem and find its solution.
- Achieving remarkable results and transforming biomedical research.
- It is to focus on the development of multi-omics technologies in advancing medicine and approaches.
- It involves basic research in epi genomics, metabolomics, and proteomics.
- Critically review the major computational techniques, algorithms, and their outcomes that have contributed to recent advances generated from biomedical research in various complex human diseases, such as cancer and infectious diseases. This will help the students to understand various principles, methods & tools for research.

PROGRAMME REPORT

Programme Name	A One-day seminar on “Emerging Trends and Updates in Biomedical and Clinical Research.”
Resource Person	Mr. Vaddadi Abhishek, Junior Chemist, Celebrity Laboratories, Kondapalli.
Date of Activity	12-11-2019
Organized By	V. V. Institute of Pharmaceutical Sciences
Venue	Seminar Hall, V. V. Institute of Pharmaceutical Sciences

The objective of the Programme:

Biomedical research by integrating massive amounts of data from laboratory experiments, clinical investigations, healthcare records, and the Internet of Things. Providing an opportunity for future advances in personalized medicine that is paving the way to improved patient care. The generation of such evidence through practice-based research should be predicted on the appropriate use of robust and rigorous methodologies. Omics technologies mixed methods and other novel approaches in pharmacy research. Developing & researching medication use & patient safety

Topic Covered:

- ✓ Different methods used in Multiomics
- ✓ Research & Development techniques
- ✓ Research methods
- ✓ Discussion method and its suitability
- ✓ Merits & De-merits
- ✓ How to overcome problems while method development
- ✓ How to improve Research techniques
- ✓ Relevance to empirical research

GUDLAVALLERU - 521 356**

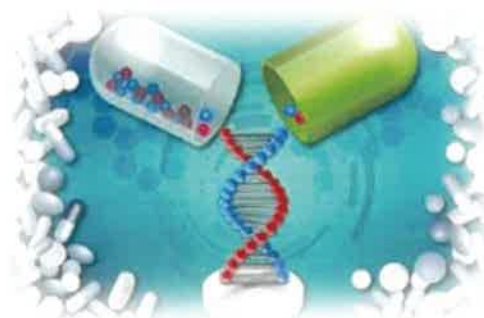

About Seminar :

This Seminar entitled on “Noval and advanced perception in medicinal chemistry and Drug research” focuses on innovative development strategies. Most importantly, medicinal chemistry enables the identification of clinical candidates and provides novel strategies aimed at improving the range and quality of hit- and lead-finding phases that, although often underestimated, are critical to reduce attrition in drug discovery. The innovative strategies are required in Pharmacy hence this conference builds an innovative session on research activities which inculcates younger minds to think innovatively and their involvement in research in order to meet social needs so that they reach the level of greatness as they deserves it.

Topics to be covered:

- # Pathobiochemistry of diseases
- # Identification and validation of (emerging) drug targets
- # Structural biology
- # Drugability of targets
- # Drug design approaches
- # Chemogenomics
- # Synthetic chemistry

Outcomes of the Programme:

The students and faculty have gained knowledge on Novel ideas and advanced perception in medicinal chemistry and Drug research.

They gain the knowledge on:

- Research is the continuous process to identify the problem and find its solution.
- It is to focus on the development of analytical methods using new combinations of established instruments and approaches.
- It involves basic research in identity, purity, and content; small molecule medicinal chemistry relies on iterative learning cycles composed of compound design, synthesis, testing, and data analysis to provide new chemical probes and lead compounds for novel and drug-able targets.
- the literature learning process of medicinal chemistry defining structure-activity relationships (SAR) is composed of computational design, compound synthesis, biological assays, and data collection
- The department involved in teaching & training postgraduate students in the subjects of analytical sciences pertaining to qualitative estimation of natural & synthetic compounds in various matrices by application of spectroscopy, chromatography & analytical methods. This will help the students to understand various principles, methods & tools for research.

PROGRAMME REPORT

Programme Name	A one-day seminar on "Novel ideas and advanced perception in medicinal chemistry and Drug research."
Resource Person	Dr. P. Nagaraju, Professor, Hindu College of Pharmacy, Guntur, AP.
Date of Activity	16-12-2019
Organized By	V. V. Institute of Pharmaceutical Sciences
Venue	Room No: 109, V. V. Institute of Pharmaceutical Sciences

The objective of the Programme:

Research and development evidence should be used to identify medicinal chemistry, enable the identification of clinical candidates, and provide novel strategies aimed at improving the range and quality of hit- and lead-finding phases that, although often underestimated, are critical to reducing attrition in drug discovery.

The generation of such evidence through practice-based research should be predicted on the appropriate use of robust and rigorous methodologies.

In addition to the quantitative & qualitative approaches used in pharmacy practice research, mixed methods and other novel approaches in pharmacy practice research. The main aim is to discover and delivering new medical drugs.

Topic Covered:

- ✓ Different methods used in medicinal chemistry
- ✓ Research & Development techniques
- ✓ Research methods
- ✓ Discussion method and its suitability
- ✓ Merits & De-merits
- ✓ How to overcome problems while method development
- ✓ How to improve Research techniques
- ✓ Relevance to empirical research

Outcomes of the Programme:

The students & faculty learned about Navigating IPR Challenges in Pharmacy right from discovery to Commercialization.

They gain the knowledge on:

- Developing new medicines is a complex and lengthy process involving several research and testing stages and regulatory approval from government agencies.
- The drug development process is complex and lengthy, involving several research, testing, and regulatory approval stages.
- Discovery and target identification, which is the initial stage of drug development, where researchers identify a target molecule, protein, or gene involved in the disease.
- About a drug which has successfully completed Phase 3 clinical trials and demonstrated safety and efficacy, the drug developer can file a New Drug Application (NDA) with regulatory authorities such as the FDA. The NDA provides detailed information about the drug's safety and efficacy, clinical trial data, manufacturing process, and proposed labeling and prescribing information.

Outcomes of the Programme:

The students & faculty learned about the Novel methods and Innovations of pharmaceutical research.

Research is the continuous process to identify the problem and find its solution.

- It is to focus on the development of research methods using novel and innovative technologies and new combinations of established instruments and approaches.
- It involves basic research in identity, purity, content, stability of starting materials, excipients, and active pharmaceutical ingredients.
- The department is involved in teaching & training postgraduate students in subjects related to research and novel methods and innovations.
- This will help the students to understand various principles, methods & tools for research.

PROGRAMME REPORT

Programme Name	A One-day seminar on “Platform to Share Novel Methods and Innovations of Pharmaceutical Research.”
Resource Person	Mrs. N.V.L. Sirisha Mulukuri, Assistant Professor, Nitte College of Pharmaceutical Sciences, Bangalore.
Date of Activity	23-01-2020
Organized By	V. V. Institute of Pharmaceutical Sciences
Venue	Seminar Hall, V. V. Institute of Pharmaceutical Sciences

The objective of the Programme:

This seminar entitled “Platform to Share Novel Methods and Innovations of pharmaceutical research” focuses on innovative development strategies and novel methods in pharmaceutical research. Recent trends and novel methods in pharmaceutical research innovative strategies are required in Pharmacy hence this conference builds an informative session on research activities which inculcates younger minds to think innovatively and their involvement in research in order to meet social needs so that they reach the level of greatness as they deserve it. The main aim is to discover and deliver new medical drugs, devices, or therapies to market.

Topic Covered:

- ✓ Different methods used in Pharmacy
- ✓ Research & Development techniques
- ✓ Research methods
- ✓ Novel Techniques
- ✓ Discussion method and its suitability
- ✓ Merits & De-merits
- ✓ How to overcome problems during method development
- ✓ How to improve Research techniques
- ✓ Relevance to empirical research

PROGRAMME REPORT

Programme Name	A one-day seminar on “Current Advances in Pharmaceutical Industry and the Development on Entrepreneurship Mode.”
Resource Person	Dr. T. Balakrishna, Sr. Associate Professor, Chebrolu Hanumaiah Institute of Pharmaceutical Sciences, Guntur, AP
Date of Activity	25-02-2020
Organized By	V. V. Institute of Pharmaceutical Sciences
Venue	Room No: 109, V. V. Institute of Pharmaceutical Sciences

The objective of the Programme:

A seminar on “Current Advances in Pharmaceutical Industry and Development on Entrepreneurship Mode” was conducted. The speaker has focused on the generation of such evidence through practice-based research should be predicted on the appropriate use of robust and rigorous methodologies. In addition to the future advancements approaches used in pharmacy practice research, mixed methods and other novel approaches in pharmacy practice research. Developing & researching medication use & patient safety. The main aim is to provide future advancements both in traditional herbal and ayurvedic medicine and based on the entrepreneurship field.

Topic Covered:

- ✓ Advances in the pharmaceutical industry
- ✓ Information on improving and developing Entrepreneurship.
- ✓ Research & Development techniques
- ✓ Different methods used in Pharmacy
- ✓ Merits & De-merits
- ✓ How to overcome problems during method development
- ✓ How to improve Research techniques
- ✓ Relevance to empirical research
