B. Pharmacy : 100 Seats

M. Pharmacy:

Pharmaceutics: 15 Seats

Pharm. Analysis: 15 Seats

About FDP :

This six days Faculty Development Program with a set of Key Note addresses and plenary /parallel sessions on each day had been designed to ensure enriching and learning experience for the participants by providing them with the contours of varied experiential learning and lived engagement both as individual and in group. A diverse panel of experts on Gender discourses, administrators, grass roots and local-self-government leaders successfully addressed the critical issues related to the emerging leadership during the COVID pandemic and the need for reinventing public policy and their application for gender justice to realize long-term outcomes.

PROGRAM REPORT

Name of the Program:

A One Week faculty development program on “**Gendered contours of the Pandemic reinventing public policy and Leadership transformation**”.

Date: 01/02/2021 to 06/02/2021.

Objectives of the program:

V.V. Institute of Pharmaceutical sciences had successively organized One Week faculty development program on “Gendered contours of the Pandemic reinventing public policy and Leadership transformation”. It strived to delve deeper into the stated themes and provide an open platform for the participants to learn and imbibe some of these key issues related to gender and policy implementation during pandemic. The participants had a great opportunity to familiarize with the listed topics from both conceptual as well as empirical perspective. It marked the initiation of participatory knowledge dissemination between the two institutions who jointly ventured to bring out a holistic transformation in higher education.

Topics Covered

- Pandemic and Leadership
- Pandemic and Health Concerns
- Pandemic and Economic Concerns

The outcome of the Program:

The FDP proved a huge success in terms of bringing together a plethora of ideas, interventions and reflections surrounding the Contours of gender in pandemic. An eminent institution as Miranda House joining hands with a regional University for the first time exemplified the transformative capacity of a collaborative approach in education and the role played by institutions in fostering a combined teaching learning process.

About FDP :

This six days Faculty Development Program on Artificial intelligence (AI) aims to mimic human cognitive functions. It is bringing a paradigm shift to healthcare, powered by increasing availability of healthcare data and rapid progress of analytics techniques. AI can be applied to various types of healthcare data (structured and unstructured). Popular AI techniques include machine learning methods for structured data, such as the classical support vector machine and neural network, and the modern deep learning, as well as natural language processing for unstructured data. Major disease areas that use AI tools include cancer, neurology and cardiology. AI helps in early deduction of stroke, diagnosis, treatment, as well as outcome prediction and prognosis evaluation. We conclude with discussion about pioneer AI systems, such as IBM Watson, and hurdles for real-life deployment of AI

PROGRAM REPORT

Name of the Program:

A One Week faculty development program on “A Future of artificial intelligence in health care system an advance data mining tool”.

Date: 14/12/2020 to 19/12/2020.

Objectives of the program:

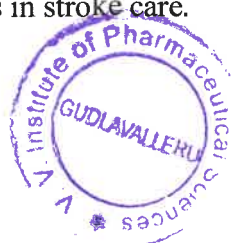

V.V. Institute of Pharmaceutical sciences had successively organized One Week faculty development program on “A Future of artificial intelligence in health care system an advance data mining tool” Recently AI techniques have sent vast waves across healthcare, even fuelling an active discussion of whether AI doctors will eventually replace human physicians in the future. We believe that human physicians will not be replaced by machines in the foreseeable future, but AI can definitely assist physicians to make better clinical decisions or even replace human judgment in certain functional areas of healthcare (eg, radiology).

Topics Covered

- Motivations of applying AI in healthcare
- Data types that have be analysed by AI systems
- Mechanisms that enable AI systems to generate clinical meaningful results
- Disease types that the AI communities are currently tackling.

The outcome of the Program:

We reviewed the motivation of using AI in healthcare, presented the various healthcare data that AI has analysed and surveyed the major disease types that AI has been deployed. We then discussed in details the two major categories of AI devices: ML and NLP. For ML, we focused on the two most popular classical techniques: SVM and neural network, as well as the modern deep learning technique. We then surveyed the three major categories of AI applications in stroke care.

CIRCULAR

All the students and Teaching and Non- Teaching staff members are informed that V.V. Institute of Pharmaceutical Sciences is conducting a Faculty Development program [FDP] on “ **Exploration of Recent Innovation in Herbal Drug Development** ” From 03-02-2020 to 07-02-2020. Hence all the students and staff members are invited to take part in this program.

Venue: Room No 111, V. V. Institute of Pharmaceutical Sciences.

About FDP :

Five days program discuss about Herbal combinations have been used in Chinese medicine practice for thousands of years, yet scientific evidence of their therapeutic benefits is lacking. With increasing interest in shifting from the one-drug-one-target paradigm to combination therapy or poly pharmacy to achieve therapeutic benefits for a number of diseases, there is momentum to explore new knowledge by tapping the past empirical experiences of herb-herb combinations. This review presents an overview of the traditional concept and practice of herb-herb combination in Chinese medicine, and highlights the available scientific and clinical evidence to support the combined use of herbs

About the College

V. V. Institute of Pharmaceutical Sciences was established in the year 2010 as esteemed promotions of A.A.N.M. & V.V.R.S.R. Educational Society.

The College aims to provide Quality Education, Training and Research facilities of high standard in Pharmaceutical Sciences and strives hard to achieve its objectives through sincere, dedicated efforts, discipline and hard work. The college is equipped with sophisticated equipment's in well-established laboratories and the state of the art library with 1680 Titles and 6282 Volumes, subscription of 10,172 E-journals, 2447 E-Books, Knimbus Networking and Magazines to meet the needs of the students. Our college research publications include more than 300 articles in reputed journals.

Courses Offered:

B. Pharmacy : 100 Seats

M. Pharmacy:

Pharmaceutics: 15 Seats

Pharm. Analysis: 15 Seats

PROGRAM REPORT

Name of the Program:

A Five day faculty development program on “**Exploration of recent innovation in herbal development**”.

Date: 03/02/2020 to 07/02/2020.

Objectives of the program:

V.V. Institute of Pharmaceutical sciences had successively organized five day faculty development program on “Exploration of recent innovation in herbal development”. As plants are nature's panacea, mankind has used them for food and healing since the dawn of time. Currently, there are worldwide initiatives targeted at finding herbal treatments in plants and promoting them using a reliable drug delivery system for people. The fundamental idea underlying it is that each disease's cure can be found in nature. But the distribution of herbal medications also needs to be modified in order to promote patient compliance, achieve sustained discharge, etc.

Topics Covered

- Processing, standardisation, extraction, and identification, herbal medications traditionally could not convince scientists to modify novel drug delivery systems.
- Advanced approaches can be used to prevent toxicity and improve stability,
- The various drug delivery systems such as phytosomes, liposomes, nanoparticles, microspheres, microemulsions, niosomes, dendrimers, etc.

The outcome of the Program:

The open feedback was collected from the faculty members. In order to enhance the delivery of herbal drugs by increasing their therapeutic benefits and reducing their toxicity, the need for innovative drug delivery systems has increased. This review provides information on numerous strategies used to increase the efficacy and safety of phyto medicines, as well as employing novel formulations.

Program Report

Objectives of the Program

V.V. Institute of Pharmaceutical Sciences had successfully organized a five days non teaching development program on **Administrative training program on proper handling techniques to animals** in association with A.A.N.M. & V.V.R.S.R. educational society. The main objective of the program to train the entire Non- teaching faculty in handling the laboratory animals are inevitably subjected to human contact throughout their lives, during both husbandry and experiments. The use of appropriate and skilled handling is essential to ensure that animals readily accept or actively seek human contact and procedures are carried out efficiently.

Topics covered

- How to handle the animals during experimentation.
- Storage conditions for particular set of animals.
- Various dose intervals for animals.

Outcome of the program

The outcome of the **Administrative training program on proper handling techniques to animals** is to reduce the animal pain and distress and improve animal welfare. Animal handling methods require training, skill, and behavioral knowledge of the species you are working with.
