POLICY ON ENVIRONMENT AND ENERGY UTILISATION

The V. V. Institute of Pharmaceutical Sciences will leave behind a spotless and environmentally friendly campus where eco-friendly instruction and extra-curricular activities promote environmentally responsible behaviour. By encouraging environmental principles among students and teachers, the green campus concept enables the institution to take the lead in the regeneration of environmental culture. The institute additionally exhorts staff members and students to embrace, put into practice, and promote ecologically beneficial behaviours in order to foster a sense of environmental awareness in both themselves and the world around them. Significant environmental problems are being caused by the expanding human presence on the earth, and these problems will only get worse over time. It will take a significant amount of work to counteract the negative effects that human activity has on the environment, which in turn affects how we connect with the outside world and one another.

To truly effect change, all problem-solving techniques must be applied.

Objectives:

The objectives of a policy on environment and energy utilization are designed to harmonize the goals of sustainable environmental protection and efficient energy usage. These objectives guide actions, strategies, and decision-making to ensure responsible resource management and mitigate environmental impacts. Here are some key objectives typically found in such a policy:

- 1. Reduce Carbon Emissions:** Mitigate greenhouse gas emissions by promoting energy-efficient practices, transitioning to renewable energy sources, and adopting low-carbon technologies.
- 2. Promote Energy Efficiency:** Enhance energy efficiency across all sectors to minimize energy waste, reduce reliance on non-renewable resources, and decrease energy costs.
- 3. Optimize Resource Utilization:** Maximize the efficient use of natural resources, including water, minerals, and land, to minimize waste and environmental degradation.
- 4. Enhance Renewable Energy Integration:** Increase the share of renewable energy sources, such as solar, wind, hydro, and geothermal in the energy mix to reduce reliance on fossil fuels.

V. V. Institute of
Pharmaceutical Sciences
Seshadri Rao Knowledge Village
GUDLAVALLERU - 521 356

- 5. Implement Sustainable Design:** Integrate sustainable principles in infrastructure and building design to minimize energy demand and environmental impact during construction, operation, and maintenance.
- 6. Foster Innovation:** Encourage research and development of clean technologies, energy-efficient processes, and eco-friendly practices that advance environmental sustainability.
- 7. Reduce Energy Consumption:** Set targets to lower overall energy consumption through measures such as energy audits, improved equipment efficiency, and behavior change campaigns.
- 8. Minimize Environmental Footprint:** Limit the negative impacts of energy production, consumption, and waste on air, water, soil quality, and ecosystems.
- 9. Promote Circular Economy:** Encourage recycling, reuse, and resource recovery to minimize waste generation and encourage sustainable production practices.
- 10. Ensure Energy Security:** Establish resilient energy systems that minimize vulnerability to supply disruptions and price volatility by diversifying energy sources.
- 11. Engage Stakeholders:** Involve stakeholders from government, industry, academia, and civil society in the development, implementation, and monitoring of the policy.
- 12. Education and Awareness:** Raise awareness about the importance of sustainable energy use and environmental conservation through educational programs and campaigns.
- 13. Enforce Regulatory Compliance:** Develop and enforce regulations and standards that support sustainable energy practices and environmentally responsible behavior.
- 14. Promote Green Jobs:** Create opportunities for job creation in industries related to renewable energy, energy efficiency, and environmental protection.
- 15. Contribute to Global Goals:** Align with international agreements, such as the United Nations Sustainable Development Goals and climate agreements, to contribute to global environmental and energy targets.
- 16. Measure and Report Progress:** Establish monitoring mechanisms to track progress towards energy efficiency and environmental goals, and regularly report results to stakeholders.

A policy on environment and energy utilization strives to align economic growth with environmental protection, fostering a balanced and sustainable future for both current and future generations.

Promotion of “ Save Energy Tips” in and outside the institute:

Promoting "save energy tips" both within and outside the institute is a proactive approach to raising awareness and encouraging energy-efficient behaviors. Here's how you can effectively promote these tips:

Within the Institute:

- **Awareness Campaigns:**
Launch awareness campaigns using posters, banners, and digital displays in high-traffic areas like lobbies, cafeterias, and classrooms. Organize special events or workshops dedicated to energy conservation, inviting experts to share insights and practical tips.
- **Digital Communication:**
Utilize the institute's website, intranet, and social media platforms to share regular energy-saving tips and updates. Send out energy-saving emails or newsletters to students, faculty, and staff, highlighting success stories and showcasing energy-efficient practices.
- **Campus Competitions:**
Organize energy-saving competitions among different departments or residence halls to encourage a friendly spirit of competition. Offer incentives, rewards, or recognition to individuals or groups that demonstrate the most significant energy reductions.
- **Smart Energy Displays:**
Install real-time energy consumption displays in prominent areas to show how energy use changes based on specific activities or times of day.
- **Green Clubs and Student Engagement:**
Collaborate with student-led green clubs to organize events, workshops, and campaigns focused on energy conservation. Encourage students to lead initiatives like energy audits in campus buildings to identify areas for improvement.
- **Energy Efficiency Tips in Classrooms:**
Incorporate energy-saving tips into the curriculum, creating an educational component that spreads awareness among students.

Outside the Institute:

- **Community Workshops:**
Host workshops or seminars open to the local community on energy-saving techniques that individuals can implement at home and work.
- **Partnerships with Local Organizations:**
Collaborate with local environmental organizations to jointly promote energy conservation in the community.
- **Public Service Announcements (PSAs):**
Create and distribute short video or audio PSAs on local radio stations, community websites, or social media platforms.

V. V. Institute of
Pharmaceutical Sciences
Seshadri Rao Knowledge Village
GUDLAVALLERU - 521 356

- **Public Events:**

Participate in local fairs, exhibitions, or community events where you can set up booths to distribute energy-saving materials and tips.

- **Engage Local Schools:**

Partner with nearby schools to share energy-saving tips with students, who can then take the information back to their families.

- **Media Coverage:**

Share success stories and initiatives related to energy conservation with local newspapers, magazines, and online media outlets.

- **Incentive Programs:**

Partner with local utility companies to promote energy-saving initiatives and offer discounts or incentives for adopting energy-efficient practices. By effectively promoting "save energy tips," you contribute not only to reducing energy consumption and utility costs but also to building a culture of sustainability within the institute and the broader community.

Renewable Energy:

Renewable energy refers to sustainable power sources derived from naturally replenishing resources like sunlight, wind, water, and biomass. These sources generate clean electricity while minimizing environmental impact and reducing carbon emissions. Solar energy harnesses the sun's rays through photovoltaic panels, while wind energy captures wind motion with turbines. Hydropower converts flowing water's kinetic energy into electricity, and bio-energy utilizes organic matter for fuel. Geothermal energy draws heat from Earth's core. Renewable energy not only addresses energy security and climate change challenges but also fosters innovation, job creation, and a greener, more sustainable future for generations to come.

Pedestrian Friendly Pathways:

Pedestrian-friendly pathways are designed to prioritize the safety, convenience, and comfort of pedestrians, encouraging walking and enhancing urban mobility. These pathways feature widened sidewalks, clearly marked crossings, adequate lighting, and landscaped surroundings. They promote active transportation, reduce traffic congestion, and improve air quality. Pedestrian-friendly pathways often connect key destinations, such as schools, parks, transit stations, and commercial areas, fostering vibrant communities and healthier lifestyles. By prioritizing pedestrians, cities create more inclusive and accessible environments, fostering a sense of community and reducing reliance on automobiles.

Waste Management:

Waste management encompasses a set of strategies and practices aimed at effectively handling, minimizing, and disposing of waste while reducing its environmental impact. It involves collection, transportation, processing, recycling, and disposal of various types of waste materials. Sustainable waste management emphasizes reducing waste generation, reusing items, and recycling materials to conserve resources and decrease landfill space. Proper waste management also prevents pollution, conserves energy, and mitigates the release of harmful substances into the environment. It plays a crucial role in promoting a cleaner, healthier, and more sustainable future for communities and the planet as a whole.

Date of the Program: 05-05-2023.

This program was organized by V. V. Institute of Pharmaceutical Sciences. The purpose of this program is to educate the students about the importance of Plantation and cleaning program. It was hosted by Ms. T.Sravani and curtain raising of the program was done by the speech of Dr. A. Lakshmana Rao which emphasis on the plantation and importance of trees in the life resources generation of humans and the program was ended with plantation by the students. So, the overall program was successful and students found it very useful for the development in the perspective in upcoming sessions of life.

Name of the program : "PLANTATION PROGRAM"

Date of the Program : 04-10-2019

This program was organized by V. V. Institute of Pharmaceutical Sciences. The purpose of this program is to educate the students about the importance of Plantation program . It was hosted by Ms. A. Datri and curtain raising of the program was done by the speech of Dr. A. Lakshmana Rao which emphasis on the plantation and importance of trees in the life resources generation of humans and the program was ended with plantation by the students. So, the overall program was successful and students found it very useful for the development in the perspective in upcoming sessions of life.

Event Report

Event Name: Swachh village

Date: 10/01/ 2023

Venue- Chitram

We left at about 9:30 AM from the V. V. Institute of Pharmaceutical Sciences and arrived at Chitram village at 9:45 AM. In addition to our NSS volunteers, the village sarpanch and other faculty members took part in this massive cleaning programme. As part of the Swachh Bharat programme, we conducted the Swachh Village Programme, in which our volunteers cleaned every street in the village, including the grounds of the temple and the school. We also advised the village people to collect household waste in dustbins and garbage bins.

Event Report

Event Name: Plantation programe on village

Date: 21/03/2021

Venue- Gudlavalleru

To maintain cleanliness and hygiene in Andhra Pradesh's urban and rural areas, our College NSS Unit carried out a plantation program in a village by doing away with open defecation, doing away with manual scavenging, managing solid and liquid waste, and engaging in information, education, and communication as well as capacity building activities. The building of public, community, and individual household restrooms is being undertaken by Swatch Andhra Corporation. Public-private partnerships are used for waste-to-energy and waste-to-compost programs, which address the scientific processing and disposal of municipal solid waste. Public-private partnerships are being used to establish C&D waste processing plants as a solution to the problem of construction and demolition waste. Additionally, steps are conducted to recover valuable municipal old waste sites via the bio-mining process. Alongside political With the backing of a highly motivated workforce and a large number of residents, the Andhra Pradesh government is prepared to make both urban and rural regions Smart, Clean, Safe, and Healthy by achieving universal access to sanitation.

Event Report

Event Name: Swachh Bharat-Cleaning, Sanitation and Disposal of garbage, Plantation programe

Date: 09/01/2020

Venue- Chitram

The NSS unit of Vallabhaneni Venkatadri Institute of Pharmaceutical Sciences, Gudlavalleru, organized a "Swachh Bharat-Cleaning, Sanitation and Disposal of Garbage" event at Chitram village. The mission's goal is to clean up rural regions' streets and highways. To alter the general impression that people have of our nation abroad, we must uphold the highest standards of sanitation and cleanliness. Participation in the event has been active on the part of all NSS student volunteers as well as teaching and non-teaching staff.

Event Report

Event Name: Swachh Village

Date: 04th January 2019

Venue- Penjandra

A strong sense of teamwork emerged in everyone's hearts as the day got underway with much enthusiasm. The only sound emanating from everyone's mouth was "PENJANDRA, here we come!" An intensely enthusiastic and fervent trip from the city centre to the centre of attention for everyone in Anguluru. Arriving at our destination at approximately 9:00 am, we left from the V. V. Institute of Pharmaceutical Sciences.

With a population of about 2000, Penjandra is a sparsely populated place. Each NSS volunteer was brimming with a brilliant sense of duty to carry out a mission that could be summed up as "NOT ME NOT YOU BUT WE!" as they first entered the community.

The task of preparing the centre stage was first given to each individual. Of all the tasks scheduled for the full seven days.

The college principal, Prof. A. Lakshmana Rao, presided over the event. The chief guest was Mrs. Bopana Padmaja, the president of Penjandra Village. Students (NSS Volunteers) attended the event, which was led by Mr. D.S.N.B.K. Prasanth, the NSS Program Officer.
